

## **NZSIF**

### **Industry Demo Days**

The NZSIF will hold three industry demo days during the 2009 season.

The schedule is as follows:

<b>Cardrona</b>	<b>Tuesday 30 June</b>
<b>Mt Ruapehu - Turoa</b>	<b>Tuesday 21 July (Wednesday 22 July - Cont)</b>
<b>Porters Ski Area</b>	<b>Wednesday 29 July</b>

The above schedule is subject to each area being open with sufficient snow. Members not holding a 2009 season pass for the appropriate ski area will be provided with a day pass.

New for 2009 is the addition of Porters Ski Area. Feed back in the survey many of you responded to suggested Porters as a viable option. Porters does not open until the first day of the holidays therefore it is not possible to hold the industry demo day during the week leading up to the holidays but the Area is very happy to host us after the holidays. Most of you who responded to the survey did not support Mt Hutt this year.

Feedback supported including a workshop in the North Island programme if Turoa is closed on the first scheduled day. If the mountain is closed on Tuesday 21 July the workshop will be held in Ohakune on that day followed by the industry demo day on Wednesday 22 July. The workshop will include boot fitting, clothing, ski/board sales and snow sports safety.

**Please diary the above dates so as many of your staff can attend at a ski area near you. Registration material will be sent to all members in May or refer to the registration form on the website below.**
